WORK EXPERIENCE

Freelance Web Developer

2022 – Present

- Design and develop responsive websites and web applications for small businesses and entrepreneurs.
- Build full-stack solutions using React, JavaScript, PHP, Laravel, MySQL, and Tailwind CSS.
- Develop custom business systems, landing pages, and portfolio websites.
- Integrate third-party APIs and implement secure authentication systems.
- Optimize website performance, mobile responsiveness, and user experience.
- Manage projects from requirements gathering through deployment and maintenance.

Application Support Engineer

REMAX of Southern Africa (Head Office)

2019 – Present

- Provide production application support for a real estate SaaS ecosystem serving 3,000+ agents
- Manage and resolve 300+ support tickets monthly, including authentication issues, data migration errors, permission conflicts, and system bugs
- Perform root cause analysis on recurring system issues and collaborate with developers to implement permanent fixes
- Assist in end-to-end feature testing and validate bug fixes before production deployment
- Escalate high-impact incidents and coordinate cross-functional resolution efforts
- Develop JavaScript (Playwright) automation scripts to streamline internal workflows and improve operational efficiency
- Create and maintain structured knowledge base documentation, reducing repetitive support queries

- Support system rollouts and feature releases with minimal operational disruption

Software Training Administrator / IT Support

REMAX Property Associates – Cape Town
2016 – 2019

- Delivered onboarding and CRM system training to new and existing agents
- Provided technical troubleshooting for email setup, system configuration, backups, and data transfers
- Assisted in maintaining daily IT operations and resolving hardware/software issues

TECHNICAL PROJECTS

Workflow Automation Bot (JavaScript, Playwright)

- Developed browser automation scripts to streamline repetitive internal workflows
- Automated data migration tasks between systems, reducing manual processing time
- Improved operational efficiency by eliminating repetitive user-driven processes
- Implemented structured automation logic with error handling and validation

Job Management System (React, Laravel, MySQL)

- Designed and developed a full-stack job management platform for service-based businesses.
- Built responsive React interfaces for job scheduling, technician management, and progress tracking.
- Developed RESTful APIs using Laravel for secure data management.
- Implemented role-based access control (RBAC) for administrators and field technicians.
- Designed MySQL database architecture supporting jobs, invoices, technicians, and activity logs.
- Created real-time workflow management features to improve operational efficiency.

Finance Tracking PWA (JavaScript, Tailwind)

- Built a Progressive Web App (PWA) for personal finance tracking
- Implemented client-side state management for transaction logging and categorization
- Designed responsive UI using Tailwind CSS
- Structured financial data for accurate tracking and reporting

Compass Rose Travel – Tourism & Transport Website

- Website handed over to maintain a responsive WordPress website for a tourism and transport company based in Cape Town.
- Customized website layouts and content using BeBuilder to align with the client's branding and service offerings.
- Implemented mobile-friendly designs to ensure a seamless user experience across devices.
- Managed website content updates, service pages, and general site maintenance.

- Assisted with performance improvements and website optimization.
